- Zoho Creator – Custom Production Management Application

Introduction

Infobyd Software Solutions is a rapidly expanding IT organization and a certified Zoho Advanced Partner, recognized for delivering comprehensive business solutions through Zoho's powerful suite of applications. As a trusted digital transformation partner, Infobyd enables organizations to streamline operations, enhance customer engagement, and accelerate business growth through innovative technology solutions.

Case Study

With a deep focus on client success, Infobyd delivers fully customized, end-to-end Zoho implementations across multiple business functions — including Customer Relationship Management (CRM), Finance, Human Resources, Inventory Management, Procurement, and more. Each solution is tailored to the client's unique workflows, ensuring seamless system integration and process optimization.

Beyond solution design and deployment, Infobyd also provides robust Quality Assurance (QA) services, offering both manual and automated testing capabilities. Leveraging Zoho Sprints for structured project and test management, the team ensures efficient test planning, defect tracking, performance validation, and continuous quality enhancement.

To date, Infobyd has successfully delivered 1,750+ projects across diverse industries such as Healthcare, Manufacturing, Education, Solar Energy, Fleet Management, Trading, Information Technology, Print & Publication, Multimedia Advertising, and Financial Services. This broad industry expertise, combined with deep knowledge of the Zoho ecosystem, empowers Infobyd to deliver scalable, reliable, and future-ready solutions that drive measurable impact and long-term success for modern enterprises.

Project Overview

This project is an Asset Management System specifically developed for the HR department of an organization. It helps manage different types of assets like Laptops, Devices, and Software, track their status, assign them to employees, and maintain employee records.

Case Study

Key Features

1. Asset Lifecycle Management

- Assets move through multiple stages such as In-stock, Assigned, Return to Stock, Buyback, End of Life, Under Repair, Scrap, Lost, non-repairable.
- Each stage is tracked systematically to provide a clear audit trail.

2. Bulk Data Handling

- The system supports bulk uploading of asset details to reduce manual entry and improve accuracy.

3. Status Tracking

- Real-time dashboard to monitor the number of assets in each status
- Drill-down capability to view detailed reports when clicking on a specific status.

4. Data Management

- Ability to update and change entity, asset type, state, region, and serial number through Active asset reports.

Problem Statement

- They have four entity (organization) for each entity they have Employee.
- For each entity they upload data of laptop, Software, Device & Office Assets.
- After upload data of Assets assigned to the employee based on entity fetch details of assets and once you assigned it get removed from the list. Means you can assigned in stock data only.
- Since each entity has large scale data of employees to manage data of all entity is a tough task in excel or document format. They could use a web- app that can help organize the data of each entity.

Case Study

Finding The Solution

- This system is developed completely in Zoho Creator to overcome the above-mentioned issues. It includes a very clean, easy to use interface which is much self-instructing and serve as a complete system in itself as demanded by the client following are some main feature of the application.
- In The Zoho Creator, we have the functionality of import so by using it can import bulk data of assets & employees.
- In The Zoho Creator, We are creating multiple reports based on Entity.so we can see separate data of each entity.
- By using a custom button in reports we can view all the assets details at one place.
- In Zoho creator we can make dashboard interactive.
- Based on dashboard we can easily see the Employee count, Assigned & Not Assigned data of all assets also we categorize data of Active & Exit employees.

Client Testimonial

About ZOHO and INFOBYD

“The team is highly mature and possesses strong hands-on experience with the tool. We sought their support to build the AMS on Creator, and they did a fabulous job. While the team takes the necessary time to ensure quality, they consistently put in their best efforts to deliver the right outcome. The Project Manager, Ms. Shefali, is exceptionally prompt and approachable, you can reach out to her at any time. Mr. Alok, the CEO, is very friendly and ensures that any escalations are addressed promptly and effectively.

Mr. Shubhanshu is a true gentleman who always thinks beyond the immediate requirement; he has a remarkable ability to foresee the consequences of today's decisions and plan accordingly.”
